Summary

Results-driven web developer with years of hands-on experience in front-end and back-end technologies. Seeking a challenging role to further apply and enhance my skills in creating responsive, user-friendly web applications. Committed to contributing innovative solutions and collaborating within a dynamic team to drive impactful digital experiences.

WORK EXPERIENCE

Freelance Web Developer

09/23 – Present

- Developed and delivered custom web applications for clients, enhancing functionality and user experience.
- Managed full project life cycles from planning to deployment, meeting deadlines and maintaining high-quality standards.
- Collaborated closely with clients to gather requirements, provide technical solutions, and ensure project success.

Media Meter Inc.

Senior Front-End Developer

02/23 – 07/23

- Ensure individual and team tasks align with key performance indicators (KPIs).
- Support the Team Lead in daily team activities and act as a point of contact for team-related issues.
- Assume the role of Officer-in-Charge (OIC) in the absence of the Team Lead, overseeing assigned infrastructure components' ongoing performance.

Front-End Developer

07/22 – 02/23

- Advocate and implement best software development practices throughout project phases
- Contribute to the entire development lifecycle, including code optimization, testing, and scalability.
- Develop reusable code, ensure technical feasibility for UI/UX designs, and prioritize application speed and performance.

Sandman Software Systems Inc.

Junior Software Developer

01/21 – 02/22

- Maintain and manage both current online and local systems (Web Portal, Database and Server Files).
- Process the client's raw data into the database accurately and correctly.
- Develops complex web applications and modules with team or independently.
- Ensuring websites are accessible across many platforms, including desktop, laptops and smartphones.

ABS-CBN Foundation

Technical Support – IT Department

01/20 – 03/20 | On-The-Job Training

- Resolve Windows/Mac network issues, software/hardware errors.
- Install and maintenance local printers and setup network printers.
- Install/update software, hardware, drivers, and upgrade computers.
